INSTRUCTIONS_INDEX

📚 Instructions Index & Quick Reference

Welcome! This page links to all key instructions, standards, and guides for this repository. Use it as your starting point for onboarding, coding, and contributing.

🏁 Start Here

- README.md: Workshop overview, setup, and key links
- Pre-Workshop Checklist: Environment and tool setup

🤖 AI & Copilot

- .github/copilot-instructions.md: Copilot and AI usage rules, TDD, Clean Architecture, DDD, testing, and commit standards
- Facilitator Guide: Workshop flow, demos, and facilitation tips

💻 Language & Architecture

- C#/.NET Coding Standards: Naming, structure, style, and best practices
- DDD & Clean Architecture: Principles and project structure (see also Copilot instructions)

🧪 Labs & Exercises

- Lab Walkthroughs: Step-by-step guides for all labs
- Lab 1: TDD with Copilot
- Lab 2: Requirements to Code
- Lab 3: Code Generation & Refactoring
- Lab 4: Testing, Documentation & Workflow

🛠️ Tooling & Automation

- VS Code Extensions: Recommended extensions
- .gitignore: Ignore rules for source control

📝 Contributing & Updates

- Propose changes via Pull Request (see [README](#))
- For new standards or major changes, update this index and link from the README

Tip: For advanced topics (Agent Mode, MCP tools, etc.), see the Facilitator Guide and Lab 3.
